WWW.OLE-LIGHTING.COM

olé

2025 | 2026

Take care of your light because it bathes those around you, the relationships and memories you have with them forever. We do it with confidence and commitment to our family, inside and outside Olé.

Take care of your light because it bathes what you do and all the effort you put into it. We do it in every design, in every lamp and in every detail for more than 30 years.

Take care of your light because it bathes your world, your parents' world and your children's world. We do it thinking about the sustainability of every decision, of every process and of every manufacture.

Take care of your light because it is the source of your ideas. We do it through our own solutions, non-conformist and efficient, that help you to illuminate your own. And because we think that the world would be a better place bathed in it.

Cuida de tu luz porque baña a los que te rodean, las relaciones y los recuerdos que tienes para siempre con ellos. Nosotros lo hacemos con confianza y compromiso con nuestra familia, dentro y fuera de Olé.

Cuida de tu luz porque baña lo que haces y todo el esfuerzo que pones en ello. Nosotros lo hacemos en cada diseño, en cada lámpara y en cada detalle desde hace más de 30 años.

Cuida de tu luz porque baña tu mundo, el de tus padres y el de tus hijos. Nosotros lo hacemos pensando en la sostenibilidad de cada decisión, de cada proceso y de cada fabricación.

Cuida de tu luz porque es el origen de tus ideas. Nosotros lo hacemos a través de soluciones propias, inconformistas y eficientes que te ayudan a iluminar las tuyas. Nosotros cuidamos de la luz de Valencia porque sabemos que es única. Y porque pensamos que el mundo sería un lugar mejor bañado por ella.

Lighting your ideas since 1992

At Olé Lighting, we have believed in well-done work for over 30 years. We are proud of our origins, our products, our people, and our unique approach to lighting. This catalog reflects the dedication behind an adventure that began in 1992, and in which we continue with the same enthusiasm as on day one.

We design and manufacture high-quality lamps using artisanal methods, always with a human touch. And we do it from Valencia for the whole world.

We care for light and people, building relationships of trust based on honesty and closeness with our extended family, both within and beyond Olé.

We are constantly seeking new lighting solutions to bring our customers' ideas to life. Always committed to offering decorative and technical lighting adapted to market trends, while staying true to our style.

Every day, we strive to be a sustainable, conscious, and responsible company in all areas of our work. That is why we guarantee unique, nonconformist, and efficient lighting solutions.

En Olé Lighting creemos en el trabajo bien hecho desde hace más de 30 años. Estamos orgullosos de nuestro origen, de nuestros productos, de nuestra gente y de nuestra forma de hacer iluminación. Y este catálogo es el reflejo del esfuerzo de una aventura que comenzó en 1992 y en la que seguimos con la misma ilusión del primer día.

Diseñamos y fabricamos lámparas de calidad de forma artesanal, siempre con un toque humano. Y lo hacemos desde Valencia para todo el mundo.

Cuidamos de la luz y de las personas construyendo relaciones de confianza basadas en la honestidad y la cercanía con nuestra gran familia, dentro y fuera de Olé.

Estamos en permanente búsqueda de nuevas soluciones de iluminación para dar luz a las ideas de nuestros clientes. Siempre con el compromiso de ofrecer iluminación decorativa y técnica adaptada a las tendencias del mercado, sin dejar de ser fieles a nuestro estilo.

Nos esforzamos cada día para ser una empresa sostenible, consciente y responsable en todas las áreas de actividad. Por ello, garantizamos soluciones de iluminación propias, inconformistas y eficientes.

Rising together from the mud

OLE FACTORY | **Aldaia, Valencia** (Spain)
Olé family

4 DAYS AFTER THE FLOODS

On October 29, 2024, the DANA storm struck our land with force, leaving behind floods that severely affected many areas of Valencia, including our factory. It was a heavy blow, an unexpected challenge that tested us both professionally and personally.

Beyond any material loss, our hearts are, now and always, with the victims and their families, as well as with all those affected in countless ways.

Amidst the adversity and the shock of seeing our streets, homes, and businesses submerged in mud, we found hope: in our team, families, friends, volunteers, neighbors, and industry colleagues who offered us their unconditional support; and in our clients, whose trust has driven us to keep moving forward.

Today, we continue facing the aftermath of this disaster, rebuilding with more energy and determination than ever. We want to express our deepest gratitude to everyone who has stood by us throughout this process.

Thank you for being part of our story. Thank you for being part of the Olé family.

El 29 de octubre de 2024, la DANA golpeó con fuerza nuestra tierra, dejando a su paso inundaciones que afectaron gravemente a muchas zonas de Valencia, incluida nuestra fábrica. Fue un golpe duro, un desafío inesperado que nos puso a prueba tanto a nivel profesional como personal.

Por encima de cualquier pérdida material, nuestro corazón está hoy y siempre con las víctimas y sus familias, así como con todos los afectados en infinitos sentidos.

En medio de la adversidad y de la conmoción de ver nuestras calles, hogares y negocios hundidos bajo el barro, encontramos esperanza: nuestro equipo, familias, amigos, voluntarios, vecinos y compañeros del sector, que nos brindaron su apoyo incondicional; y nuestros clientes, cuya confianza nos ha impulsado a seguir adelante.

Hoy seguimos haciendo frente a las secuelas de este desastre, reconstruyendo con más energía y determinación que nunca. Queremos agradecer profundamente a todos los que han estado a nuestro lado en este proceso.

Gracias por ser parte de nuestra historia. Gracias por ser parte de la familia Olé.

Proudly made in Valencia, Spain

We are light. And at Olé Lighting, we believe the world would be a better place if it were illuminated with the warm, clean, honest, and optimistic light that bathes Valencia.

We design and manufacture from Valencia for the world, which sets us apart in terms of quality, sustainability, and social commitment. We offer solutions that meet the lighting needs of interior designers, architects, and lighting professionals. We work with trusted local suppliers with proven quality. In doing so, we support the productive network of our community and promote a closer, more responsible industry.

We are committed to original and functional products, guided by the creative direction of Fernando Martínez, and collaborating occasionally with both renowned designers and emerging young talents.

Our collections encompass different styles and decorative applications, playing with a variety of materials. We create lamps that not only illuminate but also tell stories through design.

Somos luz. Y en Olé Lighting pensamos que el mundo sería un lugar mejor si estuviera iluminado con la luz cálida, limpia, honesta y optimista que baña Valencia.

Diseñamos y fabricamos desde Valencia para el mundo y eso nos diferencia en calidad, sostenibilidad y compromiso social. Ofrecemos soluciones que dan respuesta a las necesidades de iluminación de interioristas, arquitectos y profesionales de la iluminación, trabajando con un círculo de proveedores locales de confianza y calidad contrastada. Así apoyamos el tejido productivo de nuestra comunidad y fomentamos una industria más cercana y responsable.

Apostamos por un producto original y funcional, con la dirección creativa de Fernando Martínez y colaborando puntualmente tanto con diseñadores consagrados como con jóvenes talentos emergentes.

Nuestras colecciones abarcan diferentes estilos y utilidades decorativas, jugando con distintos materiales. Creamos lámparas que no solo iluminan, también cuentan historias a través del diseño.

Customization

At Olé, we know that every space is unique, which is why we offer the possibility of customizing our products. Our flexibility allows us to adapt each design in terms of size, finishes, and colors to meet the specific needs of each client.

Lighting plays a key role in creating warm and functional atmospheres. That is why we work closely with you to provide solutions that not only illuminate but also enhance the character of each project.

Additionally, we offer expert advice on lighting studies, ensuring optimal solutions for any type of space, from hotels and restaurants to offices and residences.

En Olé sabemos que cada espacio es único, por eso ofrecemos la posibilidad de personalizar nuestros productos. Somos flexibles adaptando cada diseño en medidas y acabados, para responder a las necesidades específicas de cada cliente.

La iluminación juega un papel clave en la creación del ambiente de un espacio. Por ello, trabajamos mano a mano con vosotros para ofrecer soluciones que no solo iluminen, sino que también potencien el carácter de cada proyecto.

Además, brindamos asesoramiento en estudios lumínicos, garantizando soluciones óptimas para cada cualquier tipo de espacio, desde hoteles y restaurantes hasta oficinas y residencias.

COLOR

Committed to sustainability

At Olé Lighting we strive to be a sustainable, conscious and responsible company from our internal processes to our design.

We choose sustainable materials such as GRS-certified recycled polyester, or esparto grass obtained from various wild plants.

We collaborate with local suppliers to minimize our carbon footprint and we follow artisanal processes in our manufacturing. And we do it with love and conviction. Because we only have one planet and we must take care of it.

OCEANS WITHOUT PLASTIC

Under this motto, we launched an initiative based on the use of recycled polyester, obtained from plastic bottles collected from the sea and our surroundings, giving life to our cord and acoustic material collections.

Since we started in 2022, we have removed over 16,000 kg of plastic, helping to reduce its harmful environmental impact and repurposing it into long-lasting products.

As part of this initiative, we designed labels that indicate the number of recycled bottles used in each lamp, allowing our customers to be aware of their positive impact on the planet by choosing sustainable products.

OCEANS WITHOUT PLASTIC

En Olé Lighting nos esforzamos por ser una empresa sostenible, consciente y responsable desde nuestros procesos internos hasta el diseño.

Elegimos materiales sostenibles como el poliéster reciclado con certificado GRS, o esparto obtenido de diversas plantas silvestres. Colaboramos con proveedores locales para minimizar nuestra huella de carbono y seguimos procesos artesanales en nuestra fabricación. Y lo hacemos con cariño y convicción. Porque solo tenemos un planeta y debemos cuidarlo.

OCEANS WITHOUT PLASTIC

Con este lema comenzamos una iniciativa basada en el uso de poliéster reciclado, obtenido de botellas de plástico recogidas del mar y de nuestro entorno, y que da vida a nuestras colecciones de cuerda y de material acústico.

Desde que empezamos en 2022 hemos retirado más de 16.000 Kg de plástico, contribuyendo a reducir su perjudicial impacto ambiental, y reusándolo en productos de larga vida útil.

Como parte de la iniciativa, hemos diseñado unas etiquetas que indican el número de botellas recicladas con cada lámpara, haciendo a nuestros clientes conocedores de su impacto positivo en el planeta al apostar por productos sostenibles.

Sustainable Materials

Cord Collection

Our cord collections strike the perfect balance between craftsmanship and sustainability. Each lampshade is handbraided using cord made from recycled plastic bottles, turning waste into long-lasting designs. Beyond reducing environmental impact, these models offer a wide range of shapes, sizes, and weaving patterns, with multiple color options to suit any style and space. A commitment to aesthetics and a more sustainable future.

Nuestras colecciones de cuerda son el equilibrio perfecto entre artesanía y sostenibilidad. Cada pantalla está trenzada a mano con cuerda fabricada a partir de botellas de plástico recicladas, transformando residuos en diseños duraderos. Además de reducir el impacto ambiental, estos modelos ofrecen una amplia variedad de formas, tamaños y patrones de trenzado, con múltiples opciones de color para adaptarse a cualquier estilo y espacio. Un compromiso con la estética y un futuro más sostenible.

Acoustic Collection

Design, comfort, and sustainability come together in our acoustic models, perfectly aligned with Neuroarchitecture principles. Made from recycled plastic, this sound-absorbing material enhances well-being by reducing reverberation and minimizing stress. Ideal for offices, restaurants, and hotels, these luminaires transform any space into a more welcoming and environmentally conscious experience.

Diseño, confort y sostenibilidad se aúnan en nuestras modelos con material acústico, alineándose con la Neuroarquitectura. Este componente fonoabsorbente está fabricado con plástico reciclado, y contribuye al bienestar reduciendo la reverberación del sonido y minimizando el estrés. Estas luminarias son ideales para oficinas, restaurantes y hoteles, transforman cualquier entorno en una experiencia más acogedora y respetuosa con el planeta.

Metal Collection

The sustainability and versatility of metal allow us to create designs ranging from purely decorative to highly technical solutions. We prioritize materials like aluminum, an infinitely recyclable metal that reduces environmental impact without compromising quality. We design with the future in mind: less waste, more efficiency, and sustainable lighting.

La sostenibilidad y versatilidad del metal nos permiten crear diseños que van desde lo puramente decorativo hasta soluciones técnicas eficientes. Apostamos por materiales como el aluminio, un metal infinitamente reciclable que reduce el impacto ambiental sin comprometer la calidad. Diseñamos con la mirada puesta en el futuro: menos residuos, más eficiencia y una iluminación sostenible.

Wood Collection

Wood is one of the most sustainable materials, fully recyclable and environmentally friendly. With it, we present simple and timeless designs, perfect for adding warmth to any space.

La madera es uno de los materiales más sostenibles, completamente reciclable y de bajo impacto ambiental. Con ella, presentamos diseños de líneas sencillas y atemporales, perfectos para aportar calidez a cualquier espacio.

Esparto Collection

Esparto joins our selection of sustainable materials with the ILLA collection. A natural resource with a rustic character and millennia-old tradition, obtained from various wild plants and used since prehistoric times.

El esparto se suma a nuestra selección de materiales sostenibles con la colección ILLA. Un recurso natural de carácter rústico y tradición milenaria, obtenido de diversas plantas silvestres y utilizado desde la prehistoria.

ALLEGRA

MADE WITH RECYCLED MATERIALS

ALLEGRA draws inspiration from the simplicity and elegance of a truncated cone. Its design captures the essence of nature, with soft lines and a silhouette that echoes the solidity and stability of trees.

Crafted from materials that add an organic texture, it gently diffuses light in a mesmerising way, creating a warm and inviting glow. A perfect companion for summer nights under the open sky.

ALLEGRA se inspira en la sencillez y la elegancia de la forma de un tronco de cono. Su diseño captura la esencia de la naturaleza, con líneas suaves y un perfil que evoca la solidez y estabilidad de los árboles.

Sus materiales aportan una textura orgánica al conjunto, mientras filtran la luz de manera embriagadora, creando una iluminación suave y acogedora. Una aliada para iluminar las noches de verano en plena naturaleza.

CANDELA

MADE WITH RECYCLED MATERIALS

This design seamlessly blends the best of past and present, combining the timeless charm of a traditional lantern with modern technology to meet contemporary needs.

The metal frame, finished with a textured surface, lends it a sturdy, resilient character. It emits a warm, gentle glow, reminiscent of a soft flickering flame. Crafted with clean, refined lines and subtle geometric patterns, it carries a handcrafted feel. A piece designed to accompany you in special moments, both indoors and outdoors.

Este diseño fusiona lo mejor del pasado y presente, ofreciendo tanto la estética clásica y reconfortante de un candil, como la tecnología moderna para adaptarse a las necesidades contemporáneas.

El armazón de metal con acabado texturado, le otorgan un aire robusto y resistente. Emana una iluminación cálida y suave, similar a luz de una llama tenue. Su estructura está diseñada en líneas limpias y puras, y sus patrones geométricos sutiles le dan una sensación artesanal. Una pieza diseñada para acompañarte en momentos especiales en exteriores e interiores.

CELESTE

MADE WITH RECYCLED MATERIALS

CELESTE embodies the harmony between art and science, where light becomes a medium for exploring beauty and comfort. More than just a decorative piece, this lamp serves as a bridge to aesthetic experience and introspection.

By combining an acoustic material with a linear luminaire, this design by Rafa Ortega creates an atmosphere that invites contemplation. It reminds us how sound and silence shape our interactions and human connections, prompting reflection on the importance of communication and attentive listening in our relationships.

CELESTE simboliza la armonía entre el arte y la ciencia, donde la luz se convierte en un medio para explorar la belleza y el confort. Así, la lámpara no es solo un objeto decorativo, sino un puente hacia la experiencia estética y la introspección.

Al combinar un material acústico con una luminaria en línea, este diseño de Rafa Ortega crea una atmósfera que invita a la contemplación. Nos recuerda como el sonido y el silencio afectan nuestras interacciones y conexiones humanas, haciéndonos reflexionar sobre la importancia de la comunicación y la escucha en nuestras relaciones.

NEXO

MADE WITH RECYCLED MATERIALS

With a balanced and versatile aesthetic, NEXO is a collection featuring a series of wall lamps and a table lamp. Its design allows for customization with four types of lampshades: two in metal, which provide a minimalist and contemporary style, and two in cord, adding warmth and an artisanal touch. This flexibility makes NEXO an adaptable lighting solution for various spaces and decorative styles.

Con una estética equilibrada y versátil, NEXO es una colección que cuenta con una serie de apliques y una lámpara de mesa. Su diseño permite la combinación con cuatro tipos de pantallas: dos en metal, que aportan un estilo minimalista y contemporáneo, y dos en cuerda, que añaden calidez y un toque artesanal. Esta flexibilidad convierte a NEXO en una solución de iluminación adaptable a distintos espacios y estilos decorativos.

PAGODA

MADE WITH RECYCLED MATERIALS

PAGODA, designed by Nacho Timón, displays a unique arrangement of prism-like shades with horizontal cord wrapping, transporting us to the Asian continent.

The distinctive placement of the surfaces that form its various volumes evokes the roofs of Buddhist and Hindu temples, offering a subtle nod to the Far East. These shades gently embrace the light, nurturing and protecting it, while creating warm and inviting atmospheres. They cast intriguing light projections onto adjacent surfaces, enhancing any space or design project with their captivating charm.

PAGODA, diseñada por Nacho timón, presenta una original disposición de pantallas a modo de prismas con encordado horizontal que nos transporta al continente asiático.

La peculiar disposición de las superficies que conforman sus diferentes volúmenes, evoca los tejados de los templos budistas e hinduistas lo que le proporcionan un sutil guiño al lejano oriente. Estas acarician la luz, mimándola y protegiéndola, proporcionando sugerentes y cálidas atmosferas al crear diferentes proyecciones de luz sobre las superficies adyacentes de cualquier estancia o proyecto.

AVATAR PLUS

No limits! AVATAR PLUS is the state-of-the-art design from our existing AVATAR collection, adding a new original system to create polygonal shapes or never ending LED linear designs. AVATAR PLUS allows to twist and orientate each profile individually with bare hands. The required drivers are supplied (one driver for every 9 meters) up to the unlimited length which you may need for your own composition. Profiles of 1 or 2 meters to combine as per your own creativeness and personal unique solution.

Sin límites: así es AVATAR PLUS. Este diseño de suspensión que sigue la línea AVATAR, tiene su propio y original sistema. Diseña formas cerradas o abiertas creando recorridos de luz por todo el espacio. Orienta y dirige la luz donde la necesites, adaptándola a las necesidades del entorno.

Suministramos los drivers necesarios (uno por cada 9 metros), hasta la longitud ilimitada que pueda necesitar para su propia composición. Los perfiles, disponibles en medidas de 1 y 2 metros, se conectan mediante rótulas articuladas y orientables, brindando una gran flexibilidad y personalización en la composición de tu iluminación.

AVATAR POP

This design was created to illuminate large spaces with suspended lines of light positioned at different points. AVATAR POP is available as a single pendant or with multiple suspensions. This allows for the creation of arrangements with up to four high-lumen profiles, combining different sizes to adapt seamlessly to any design or functional requirement.

Each pendant features a convenient manual adjustment system, allowing for an orientation angle of up to 105°, delivering precise and customizable lighting in any setting.

Este diseño surge con el propósito de iluminar grandes espacios a través de líneas de luz suspendidas estratégicamente en distintos puntos. AVATAR POP se presenta como un colgante individual y múltiple. Esto permite crear conjuntos de hasta cuatro perfiles de alta potencia lumínica, combinando diferentes tamaños para adaptarse a cualquier necesidad de diseño o funcionalidad.

Cada colgante está equipado con un práctico sistema manual de orientación que permite ajustar su ángulo hasta 105°, ofreciendo una iluminación precisa y personalizada en cualquier entorno.

AVATAR TWIST

A linear design inspired by the trail of shooting stars. It is composed of a black aluminium profile with PCB LED and a polycarbonate diffuser.

It is based on a wall-to-wall lighting concept, without vertical suspension accessories. It can also be installed from ceiling to floor or on sloped ceilings, allowing an angle of up to 10° with the anchoring walls.

It reaches a length of up to 10 meters of illuminated profile, with a maximum distance of 12 meters from end to end. Additionally, it is designed with a system that allows manual 360° rotation once installed.

These unique features make AVATAR TWIST a highly functional design due to its versatile mounting options, making it a model that meets the lighting needs of demanding projects.

Un diseño lineal inspirado en la estela de las estrellas fugaces. Está compuesto por un perfil de aluminio negro con PCB LED y difusor de policarbonato.

Se basa en un concepto de iluminación de pared a pared, sin accesorios de suspensión vertical. También puede instalarse de techo a suelo o en techos inclinados, permitiendo un ángulo de hasta 10° con las paredes de anclaje.

Alcanza una longitud de hasta 10 metros de perfil iluminado, en una distancia máxima de 12 metros de extremo a extremo. Además, está diseñado con un sistema que permite una rotación manual de 360° una vez instalado.

Estas particularidades convierten a AVATAR TWIST en un diseño altamente funcional por sus diferentes posibilidades de montaje, convirtiéndose en un modelo que resolverá las necesidades de iluminación de proyectos exigentes.

EXAMPLE OF HOW TO ORDER / EJEMPLO DE COMO PEDIR

FIRST STEP / PRIMER PASO

Measure the distance between the two luminaire's installation points. / Mida la distancia entre los dos puntos de instalación de las luminarias.

SECOND STEP / SEGUNDO PASO

Subtract 20 cm for the fixation hardware (10 cm each side). / Restar 20 cm para los soportes de fijación (10 cm cada lado).

THIRD STEP / TERCER PASO

Fill the remaining length with 100 cm LED profiles. The remaining space will be with exposed steel cable. To reduce exposed steel cable, add a 25, 50, or 75 cm module profile if desired / Completar la longitud restante con los perfiles LED de 100 cm. El espacio restante quedará con cable de acero visto. Para reducir la cantidad de cable de visto, añadir un módulo de 25, 50 o 75 cm.

YOUR ORDER / TU PEDIDO:

1 x 30010/700 + 1 x ref. 30010/75 = 775 cm

Exposed stainless steel / Cable de acero visto: 15 cm

BANYO

MADE WITH RECYCLED MATERIALS

Designed by Hugo Tejada Studio, the BANYO collection stands out for its handcrafted lampshade made with sustainable cord. With a wide range of applications and colors, BANYO allows you to combine and customize the lighting of any space. The warmth of the cord makes it the perfect choice for creating cozy atmospheres that adapt to all decorative styles.

Diseñada por el estudio de Hugo Tejada Studio, la colección BANYO destaca por su pantalla artesanal elaborada con cuerda sostenible. Con una amplia variedad de aplicaciones y colores, BANYO se permite combinar y personalizar la iluminación de una estancia. La calidez de la cuerda, la convierten en la elección perfecta para crear atmósferas acogedoras que se adaptan a todos los estilos decorativos.

BIMBA

Eye-catching design that allows for combining braided rope colors over a metallic structure. BIMBA not only fulfills its function of providing light but also becomes a decorative element that captures everyone's attention. Its distinctive style makes it the perfect choice to transform any space into a vibrant and sophisticated environment.

Llamativo diseño que permite combinar colores de cuerda trenzada sobre una estructura metálica. BIMBA no solo cumple su función de iluminar, sino que se convierte en un elemento decorativo que captura todas las miradas. Su estilo distintivo hacen que sea la opción perfecta para transformar cualquier espacio en un ambiente vibrante y sofisticado.

BLOCK

The BLOCK collection is inspired by children's building block games. With its basic lines and size options, it invites you to design your own composition. Its metallic structure is covered with stretching fabric, which fits perfectly to create clean, modern shapes.

La colección BLOCK está inspirada en los juegos de bloques para niños. Con sus líneas básicas y sus opciones de tamaños, te invita a diseñar tu propia composición. Su estructura metálica está cubierta por tela elástica, que se adapta perfectamente para crear formas limpias.

CLONE

Inspired by the geometry of a honeycomb, CLONE stands out with its metallic structure covered in white stretching fabric, adding a sense of lightness to the design. It can be installed as a single piece or configured into modular designs to create personalized and never-ending compositions.

Inspirada en la geometría de una colmena, CLONE destaca por su estructura metálica cubierta con tela blanca elástica, que aporta ligereza al diseño. Puede instalarse como una pieza única, o bien creando diseños modulares para formar composiciones personalizadas.

Designed by Nacho Timón, DIAL is a circular wall lamp that elegantly combines metal and cord. This model allows walls to be bathed in soft ambient light, perfect for creating cozy atmospheres. In its spotlight version, DIAL also provides a practical reading light, seamlessly blending functionality and aesthetics.

Creado por Nacho Timón, DIAL es un aplique de diseño circular que combina con elegancia metal y cuerda. Este modelo permite bañar las paredes con una suave luz ambiental, ideal para crear atmósferas acogedoras. En su versión con foco, DIAL ofrece además un práctico apoyo para la lectura, uniendo funcionalidad y estética.

DRUM

MADE WITH RECYCLED
MATERIALS

DRUM is a collection that stands out for its strong artisanal essence, featuring models crafted from hundreds of meters of sustainable hand-braided cord. Its variety of formats, colors, and simple lines make it a perfect design to seamlessly integrate into all kinds of projects.

DRUM es una colección que destaca por su gran carga artesanal, con modelos elaborados a partir de cientos de metros de cuerda sostenible trenzada a mano. Su variedad de formatos y colores, y sus líneas sencillas, lo convierten en un diseño perfecto para integrarse con naturalidad en todo tipo de proyectos.

FLIPPO

Minimalist, elegant, and modern: FLIPPO is a collection of refined ceiling lights featuring a clean design and textured finishes. It is available as a single fixture for a subtle touch or in groups of three to create dynamic ceiling compositions. FLIPPO seamlessly combines simplicity and aesthetics, making it the perfect addition to any contemporary space.

Minimalista, elegante y moderno. FLIPPO es una colección de sofisticados plafones de diseño limpio y acabados texturizados. Se presenta como un plafón individual para un toque discreto, o en agrupaciones de tres, creando composiciones dinámicas en el techo. FLIPPO combina simplicidad y estética para integrarse perfectamente en cualquier espacio contemporáneo.

Manex Bilbao Studio has designed HABE, the Basque word for "column". The designer was inspired by the elegance and solidity of these architectural pieces. This family of lamps meets history, creating a design that transcends time and highlights the eternal beauty of these structures. The light emanating through the cords is soft and enveloping, bringing life to any indoor or outdoor space.

Manex Bilbao Studio ha diseñado HABE, palabra vasca que significa "columna". Su diseñador se ha inspirado en la elegancia y solidez de estas piezas arquitectónicas. Esta familia de lámparas se encuentra con la historia creando un diseño que trasciende el tiempo y remarca la eterna belleza de estas estructuras. La luz que emana a través de las cuerdas es suave y envolvente, proyectando vida a cualquier espacio interior como exterior.

HALLEY

This comet-inspired design challenges traditional symmetries with a striking composition of irregular faces and angles that captivate the eye. Made with washable stretching fabric that fits precisely over its distinctive metallic structure.

Este diseño inspirado en un cometa desafía las simetrías tradicionales con una composición de caras y ángulos irregulares que atraen la mirada. Fabricado con tela elástica lavable que se ajusta con precisión a la peculiar estructura metálica.

This collection of suspensions join materials as different as esparto and metal, giving rise to designs that combine the rustic with the modern. The esparto conveys the honesty and tranquillity of nature, while the metal brings a distinctive contemporary elegance.

Esta colección de colgantes une materiales tan diferentes como el esparto y el metal, dando lugar a unos diseños que combinan lo rústico con lo moderno. El esparto nos transmite la franqueza y tranquilidad de la naturaleza, mientras el metal, aporta una distintiva elegancia contemporánea.

KATANA

A practical and useful design in different areas. KATANA is a suspension that consists of an extruded aluminium profile with UGR and suspended by belt. In addition, it has a manual orientation system that allows to bathe walls. KATANA provides the right lighting and functionality both for work environments and for spaces dedicated to exhibitions, museums or art galleries.

Un diseño práctico y útil en diferentes ámbitos. KATANA es un colgante que consiste en un perfil de extrusión de aluminio con UGR y suspendido por cintas. Además, cuenta con un sistema manual de orientación que permite bañar paredes. KATANA aporta la iluminación y funcionalidad adecuadas tanto para entornos de trabajo, como para espacios dedicados a exposiciones, museos o galerías de arte.

KIT POP-UP

MADE WITH RECYCLED MATERIALS

This versatile collection consists of a series of accessory "kits" designed to fulfill various functions. From individual pendants, multi-light configurations, and track systems to wall lamps with fixed or adjustable arms, these designs offer exceptional flexibility to meet a wide range of lighting needs. The key appeal lies in the ability to pair them with a wide variety of lampshades, allowing each designer to unleash their creativity and fully customize their lighting solution. KIT POP-UP is the perfect choice for those seeking functionality, style, and originality in their projects.

Esta versátil colección está compuesta por una serie de "kits" a modo de accesorios que cumplen diferentes funcionalidades. Desde colgantes individuales, múltiples y para carril, hasta apliques con brazos fijos o móviles. Estos diseños brindan una enorme flexibilidad para resolver múltiples necesidades de iluminación. Su principal atractivo radica en la posibilidad de combinar una amplia variedad de pantallas, permitiendo a cada diseñador dar rienda suelta a su creatividad y personalizar al máximo su solución de iluminación. KIT POP-UP es la elección ideal para quienes buscan funcionalidad, estilo y originalidad en sus proyectos.

MADE WITH RECYCLED MATERIALS

This elegant and sustainable design, featuring a flared structure, is available in pendants of various sizes, floor lamps, and table lamps. With cord as the main material, it stands out for its warmth and natural appeal, making it a timeless piece that integrates into any interior space design.

Este diseño elegante y sostenible con estructura acampanada, está disponible en colgantes de distintos tamaños, lámparas de pie y sobremesa. Con la cuerda como material principal, destaca por su calidez y naturalidad, convirtiéndose en una pieza atemporal que se integra en cualquier diseño de espacio interior.

LLUNA is a circular design with a zig-zag weave that adds character and originality to any space. Its aesthetic strikes the perfect balance between the simplicity of a sphere and the intricate craftsmanship of sustainable cord, creating a distinctive style that sets it apart from any other circular design.

LLUNA es un diseño circular trenzado en zig-zag, que aporta carácter y originalidad a cualquier espacio. Su estética es el equilibrio perfecto entre la sencillez de una esfera y el elaborado trabajo artesanal con cuerda sostenible, que crean un estilo distintivo que lo diferencian de cualquier diseño circular.

MANOLO

MANOLO is a versatile design with multiple applications. The pendant versions integrate seamlessly into spaces, creating a floating effect as they are suspended by steel cables. They can be linear, with a 350° rotation capability, or arranged in square or rectangular configurations. It is also available as a wall light with dual-sided light output, suitable for both horizontal and vertical installations.

In all its variations, the minimalist design ensures easy integration into eclectic settings. Its aluminum profile comes in white, black, or with a natural oak or walnut wood finish.

MANOLO es un diseño versátil con diferentes aplicaciones. Las versiones colgantes se integran fácilmente en el espacio, generando un efecto flotante al estar suspendidos por cable de acero. Pueden ser lineales, que permiten una rotación de 350°, o en disposiciones cuadradas o rectangulares. También disponible como aplique con salida de luz a ambos lados, para instalaciones tanto horizontales como verticales en paredes.

En todas sus variantes, el diseño es minimalista lo que permite su integración en ambientes eclécticos. Su perfil de aluminio puede ser blanco, negro o recubierto de madera de roble natural o nogal.

MARIOLA

MARIOLA is defined by its visible metal structure wrapped in sustainable cord, creating a visually striking design. Its distinctive decorative essence shines through in every version. In line with the rest of our cord collections, MARIOLA is the ideal choice for those seeking unique lighting pieces with a sustainable soul.

MARIOLA se caracteriza por su estructura metálica visible envuelta en cuerda sostenible, creando una propuesta visualmente atractiva. Su diseño destaca por su gran esencia decorativa en todas sus versiones. En línea con el resto de nuestras colecciones de cuerda, MARIOLA es la opción ideal para quienes buscan piezas de iluminación únicas con alma sostenible.

MEDUSA

MADE WITH RECYCLED MATERIALS

MEDUSA, “jellyfish” in spanish, has been inspired by the movements of the marine animals from which it takes its name, the elegant ballerinas of the sea that, with their hypnotic choreography, glide lightly through the depths of the oceans. That's MEDUSA. A changing design that captures the beauty and versatility of the nature of the undersea world.

It consists of two versions for different uses. One is presented as a decorative piece that releases an ambient light from the static upper ring, enhancing the design of the lamp from above. And the other with the light in the mobile lower ring, allowing the light to be focused, making it ideal for illuminating surfaces.

MEDUSA está inspirada en los movimientos de los animales marinos de los que toma el nombre, las elegantes bailarinas del mar que, con su hipnótica coreografía, se deslizan con ligereza por las profundidades de los océanos. Así es MEDUSA. Un diseño cambiante que captura la belleza y versatilidad de la naturaleza del mundo submarino.

Esta familia consta de dos versiones de diferente uso. Una se presenta como una pieza decorativa que desprende una luz ambiental estática desde el aro superior, realzando el diseño de la lámpara desde lo alto. Y otra con la luz en el aro inferior móvil, que permite focalizar la luz, siendo idónea para iluminar superficies.

MORGANA

MADE WITH RECYCLED MATERIALS

Inspired by the witch from the legends of King Arthur and Merlin the wizard. The witch Morgana had the power to change shape, a feature given to our lamp.

MORGANA is a living, changing design that allows you to play with shapes whenever you want. A unique and innovative lighting concept in which the designer, Fernando Martínez, has involved the end-user as part of the design, participating in its final layout by sliding its rings vertically by hand.

A highly customisable design designed with sustainable cord, available in 14 different cord colours. Multiple configurations brought together in a single lamp that transforms its appearance into a new one.

Inspirada en la bruja de las leyendas del Rey Arturo y Merlín el mago. Morgana, poseía el poder de cambiar de forma, una característica que hemos trasladado a nuestra lámpara.

MORGANA es un diseño vivo y cambiante que te permite jugar con las formas cuando lo desees. Un concepto de iluminación único e innovador en el que el diseñador, Fernando Martínez, involucra al usuario final en el diseño, participando en su configuración final al deslizar manualmente sus aros de forma vertical.

Un diseño altamente personalizable, diseñada con cuerda sostenible disponible en 14 colores. Múltiples configuraciones en una sola lámpara que transforma su aspecto en uno nuevo.

NATURE

Timeless elegance in natural form. NATURE celebrates the beauty and purity of solid beech wood, showcasing its natural warmth and elegance. This design embodies simplicity and authenticity. Featuring solid natural wood paired with an opal glass diffuser, NATURE brings a soft, organic touch to any space. Pure design, pure craftsmanship, pure NATURE.

Elegancia atemporal en su forma más natural. NATURE celebra la belleza y pureza de la madera de haya, destacando su calidez y elegancia natural. Este diseño encarna la simplicidad y la autenticidad. Con madera maciza combinada con un difusor de cristal opal, NATURE aporta un toque suave y orgánico a cualquier espacio.

In this design by Nacho Timón, the cords intertwine to create an organised chaos as a fractal, which extends across the metal structure, generating volumes on each of its faces.

En este diseño de Nacho Timón, las cuerdas se entrelazan entre si creando un caos organizado a modo de fractal, que se extiende por la estructura metálica generando volúmenes en cada una de sus caras.

PACO

PACO emerges as a functional lighting design that retains its decorative essence. Its metallic shades feature an adjustable system, allowing the light to be directed in different directions. Additionally, thanks to its practical stoppers, it can illuminate multiple areas of a room simultaneously, adapting to various needs.

Available in configurations ranging from one to six pendants, PACO also offers a special track version and a plug-in option, providing versatility and solutions for any space.

PACO surge como un diseño de iluminación funcional que mantiene su esencia decorativa. Sus pantallas metálicas cuentan con un sistema de orientación, permitiendo dirigir la luz en distintas direcciones. Además, gracias a sus prácticos stoppers, es posible iluminar varias zonas de la estancia simultáneamente, adaptándose a diferentes necesidades.

Disponible en configuraciones de uno a seis colgantes, PACO también incluye una versión especial para carril y otra con enchufe, ofreciendo versatilidad y opciones para cualquier espacio.

The essence of PAMPA is to provide an optimal environment in workspaces. It is designed to illuminate properly, while supporting the soundproofing of a space. Thanks to the sound-absorbing material, it reduces noise, and with UGR glare control technology, it ensures uniform light distribution, minimising disturbing reflections.

La esencia de PAMPA es proporcionar un entorno óptimo en espacios de trabajo. Se trata de un diseño ideado para iluminar adecuadamente, a la vez que sirve de apoyo a la insonorización de un espacio. Gracias al material fonoabsorbente consigue reducir el ruido, y con la tecnología de control de deslumbramiento UGR, garantiza una distribución de luz uniforme, minimizando los reflejos molestos.

PEPO

Winner of the German Design Award in the 'Excellent Product Design' category, PEPO is a versatile and functional lighting solution. Its design is based on a sleek aluminium spotlight in the shape of a cylinder, featuring an orientation system that allows the light to be directed wherever desired. Available in configurations ranging from one to six pendants, as in a special version for track, it adapts to a variety of installation needs.

Ganador del German Design Award en la categoría "Excelente Diseño de Producto", PEPO es una solución de iluminación versátil y funcional. Su diseño se basa en un foco estilizado de aluminio con forma de cilindro, con un sistema de orientación que permite dirigir la luz donde se desea. Disponible en configuraciones de uno a seis colgantes, y en versión especial para carril, adaptándose a diversas necesidades de instalación.

POLARIS

Create a stellar ambiance with POLARIS. In this family of wall, ceiling, and pendant lamps, the stretching fabric takes center stage, transforming into a faceted structure as it molds to the lines of the metallic framework of this design.

Crea un ambiente estelar con POLARIS. En esta familia de apliques, plafones y colgante, la tela elástica es la protagonista, transformándose en una estructura facetada al adaptarse a las líneas del armazón metálico de este diseño.

POMA

MADE WITH RECYCLED MATERIALS

This collection is characterized for its zig-zag hand-braiding, which adds dynamism and originality to the design, allowing light to pass through and create reflections that will envelop your space in a unique atmosphere. The series also includes outdoor-adapted versions with IP64 protection, safeguarding the fixture against dust and making it resistant to water splashes. POMA combines functionality and aesthetics in a striking design for both indoor and outdoor settings.

Esta colección destaca por su trenzado en zig-zag que aporta dinamismo y originalidad, dejando pasar la luz creando reflejos que envolverán en una atmosfera única tu espacio. Esta serie ofrece también unas versiones adaptadas para exterior con IP64, protegiendo la luminaria frente al polvo y haciéndola resistente a salpicaduras de agua. POMA combina funcionalidad y estética en una llamativa propuesta para interior y exterior.

RITA

RITA is a collection that stands out for its sleek lines of light integrated into an aluminum profile, perfect for adding elegance and functionality to any space. It features two versions:

RITA LINE: A wall-to-wall lighting system with lengths of up to 10 meters, offering endless possibilities to suit diverse design needs.

RITA POP: A suspension version with 1 to 5 pendants, allowing each profile to be positioned exactly where light is needed.

This minimalist and versatile collection provides original lighting solutions, seamlessly adapting to modern and creative projects.

RITA es una colección que destaca por sus finas líneas de luz integradas en un perfil de aluminio, ideal para aportar elegancia y funcionalidad a cualquier espacio. Consta de dos versiones:

RITA LINE: Un sistema de iluminación de pared a pared, con una longitud de hasta 10 metros y posibilidades infinitas para adaptarse a diferentes necesidades de diseño.

RITA POP: Una versión de suspensión de 1 a 5 colgantes, que permite ubicar cada perfil en la donde se necesite luz.

Esta colección minimalista y versátil, ofrece originales soluciones de iluminación, adaptándose perfectamente a proyectos modernos y creativos.

SAVINA

MADE WITH RECYCLED MATERIALS

Elegance and craftsmanship in perfect harmony. SAVINA is defined by its simple yet refined design, featuring sustainably hand-braided cord on a conical metal structure. Inside, it houses a black metal spotlight, making this pendant an ideal decorative choice for highlighting specific elements. A version with E27 light bulb is also available.

Elegancia y artesanía en perfecta armonía. SAVINA se define por su diseño sencillo y refinado, con cuerda sostenible trenzada artesanalmente sobre una estructura metálica de forma cónica. En su interior alberga un foco metálico negro que hacen de este colgante una opción decorativa ideal para resaltar elementos decorativos. También disponible una versión con bombilla vista.

The SENIA pendants feature a minimalist design with simple cylindrical shapes, where the material adds a distinctive touch with its range of colors. Crafted with sustainable cord made from recycled plastic bottles, these models gently diffuse light, creating warm and inviting atmospheres.

Los colgantes SENIA cuentan con un diseño de líneas minimalistas formando un sencillo cilindro, donde el material da el toque de particularidad con su gama de colores. Elaboradas con cuerda sostenible fabricada a partir de botellas de plástico recicladas, estos modelos filtran suavemente la luz, creando entornos acogedores.

SENTO

SENTO is a design featuring conical metal shades, complemented by an acrylic diffuser that softens the light for a uniform and elegant illumination. It is available in various versions, including individual and multiple pendants, with an adjustable system to direct the light as needed in the space.

As a new feature, we have updated the collection's finishes: textured terracotta, sand, green, white, and black. This color palette brings us closer to nature and integrates seamlessly into any interior design style.

SENTO es un diseño de campanas metálicas troncocónicas, complementadas con un difusor acrílico que suaviza la luz para una iluminación uniforme y elegante. Disponible en diferentes versiones colgantes individuales y múltiples, con sistema de orientación para adaptar la luz según las necesidades del espacio.

Como novedad, hemos actualizado los acabados de la colección: teja, arena, verde, blanco y negro texturizados. Esta paleta de colores nos acerca a la naturaleza y se integra perfectamente en cualquier estilo de interiorismo.

SONORA

MADE WITH RECYCLED MATERIALS

A combination of functionality and design. The Sonora desert is a natural environment where nothing is heard but the placid sound of nature. Thus, this family of ceiling and suspension lights is designed with high quality sound-absorbent material to reduce ambient noise while illuminating the space, creating a more peaceful and welcoming atmosphere.

Una combinación de funcionalidad y diseño. El desierto de Sonora es un entorno natural donde no se escucha más que el plácido sonido de la naturaleza. Así, esta familia de plafones y colgantes está diseñada con material fonoabsorbente de alta calidad para reducir el ruido ambiental a la vez que iluminan el espacio, creando una atmósfera más tranquila y acogedora.

The TINA model is a design inspired by clay pitchers, reinterpreted with a contemporary approach. The light gently filters through its two layers of hand-braided cord, creating a warm and cozy effect that makes any space feel special.

El modelo TINA destaca por su diseño inspirado en los cántaros de arcilla, reinterpretado con un enfoque contemporáneo. La luz se filtra suavemente a través de sus dos capas de cuerda, generando un efecto cálido y acogedor que hacen especial cualquier espacio.

TI-ZAS

Using aluminum and polycarbonate extrusion, we have created these minimalist "chalk strokes" illuminated by PCB-LED technology. Their modular nature allows for multiple combinations, adapting to any space with creativity and style.

Con la extrusión del aluminio y del policarbonato hemos creado estos "trazos de tiza" de diseño minimalista, iluminados mediante PCB-LED. Su carácter modular permite múltiples combinaciones, adaptándose a cualquier espacio con creatividad y estilo.

OCEANS WITHOUT PLASTIC

Since we started in 2022 until the end of 2024, we have recycled over 16,000 kg of plastic through our cord and acoustic lamps. We thank our customers for making this initiative possible.

Desde que empezamos en 2022 hasta finales de 2024, hemos reciclado más de 16.000 kg de plástico con nuestras lámparas de cuerda y de material acústico. Agradecemos a nuestros clientes haber hecho posible esta iniciativa.

NATURE

CONDITIONS, GUARANTEE AND MAINTENANCE

FM ILUMINACIÓN, S.L.U. reserves the right to make any changes it believes are beneficial to the products of the present catalogue., with the aim to improve the characteristics, safety or lighting applications.

Due to printing processes, colors should be considered approximate, not exact.

WOOD

Due to the nature of the material, the wood finish may vary between models, showing differences in tone and grain.

FABRIC LUMINAIRES MAINTENANCE

Before placing the fabric, clean the metal structure. Use the included gloves for handling. If the fabric appears slightly wrinkled, you may iron it before installation. Wash the fabric separately using mild soaps and cold water. Replacement fabrics are available for all models.

TECHNICAL INFORMATION: Dimmable drivers for LED

(V) Analogical regulation system 0-10V: By means of a potentiometer connecting two wires to the DRIVER, it transmits a signal that goes from 0 to 10V. Being 0V off and 10V the maximum brightness

(P) PUSH Regulation system: Light intensity regulation occurs through the use of a "normally open" type push button and it is the easiest type of regulation available on the market, only one push button for regulation (turn off with a rapid pulse, and is regulated by a long pulsation), only one wire from de push button to the driver

(D) Digital regulation system DALI: This interface has been jointly developed by the most important producers of electronic driver s to create a standard regulation for the lighting engineering industry all over the world.

(R) Remote control regulation system: The radio remote control management system utilizes electromagnetic waves to transmit the signals. Dimmable Kelvins and Power.

(LC) Leading & Trailing-edge dimming LC: This type of controlling is accomplished without any need for an additional control wire. It involves connecting a dimmer in series between one of the mains wire and the equipment

(C) Casambi regulation system: Casambi dimming is advanced wireless technology for controlling lighting systems via Bluetooth, available for smartphones, tablets and smartwatches. In case of installations with light bulbs, these must be dimmable

CONDICIONES, GARANTÍAS Y MANTENIMIENTO

FM ILUMINACION, S.L.U. se reserva el derecho de efectuar modificaciones en los modelos del presente catálogo, con el fin de mejorar sus características de diseño, su seguridad o sus funciones luminotécnicas.

Debido a los procesos de impresión, los colores deben considerarse aproximados, no exactos.

MADERA

Debido a la naturaleza del material, el acabado de la madera puede variar entre modelos, presentando diferencias en tono y veta.

MANTENIMIENTO DE LUMINARIAS DE TELA

Antes de colocar la tela, limpiar la estructura metálica, para su colocación utilizar los guantes que se incorporan. En caso de que la tela quede algo arrugada, la puede planchar antes de colocarla. Lavar la tela por separado, utilizar jabones neutros y agua fría. Disponemos de telas de recambio para todos los modelos.

INFORMACIÓN TÉCNICA: Drivers Regulables LED

(V) Regulación analógica de 0-10V: Mediante un potenciómetro conectando dos hilos al DRIVER, transmite una señal que va de 0 a 10V. Siendo 0V apagado y 10V el máximo de luminosidad.

(P) Regulación PUSH: La regulación se produce a través de un pulsador normalmente abierto, que mediante un solo hilo conectado al DRIVER desde el pulsador, regula la intensidad de luz, además permite su apagado completo mediante una pulsación rápida, y se regula mediante una pulsación larga que sube o baja la intensidad alternativamente

(D) Regulación DALI: Mediante el estándar de regulación digital DALI (Digital Addressable Lighting Interface). Controlado mediante una centralita, permite un control total de la instalación, memorizar escenarios de luz, etc.

(R) Regulación Remota: La regulación se realiza mediante un mando a distancia, que nos permite controlar la temperatura de color de la luz (en grados Kelvin) o su intensidad.

(LC) Regulación por corte de fase: La regulación se realiza mediante un regulador de corte al inicio y/o al final de fase. No necesita hilos adicionales dirigidos al DRIVER, ya que es un regulador en serie colocado entre la línea de alimentación y el DRIVER.

(C) Regulación Casambi: La regulación Casambi consiste en tecnología inalámbrica avanzada para controlar sistemas de iluminación a través de bluetooth, disponible para smartphones, tablets y smartwatch. En el caso de instalaciones con bombillas, estas han de ser regulables.

QUALITY GUARANTEE

Our aim is to provide the best quality both to our products and our services, trying to achieve maximum customer satisfaction, this objective is backed by AENOR and its quality stamps we have got.

CORPORATE SOCIAL RESPONSIBILITY

Our Corporate Social Responsibility is based on the active and voluntary contribution to social, economic and environmental improvement. Over the years, we have collaborated with various NGOs such as "Doctors Without Borders", "Doctors of the World", "OXFAM Intermón", "Malembe", and "Creer en Ellas". These organizations carry out initiatives aimed at improving healthcare and education for people in different parts of the world who have no resources.

We support Functional Diversity by outsourcing work to "Tomás de Osma Occupational Centres", which provide habilitative and/or comprehensive rehabilitative care to individuals with intellectual disabilities in working age. These centers aim to achieve the highest possible levels of autonomy, well-being, and inclusion, as they often face difficulties integrating into a special employment center or an ordinary company.

COMPROMISO DE CALIDAD

Nuestro objetivo es proporcionar la mejor calidad tanto a nuestros productos como a nuestros servicios, intentando conseguir la máxima satisfacción al cliente. Nos avalan los sellos de calidad AENOR.

RESPONSABILIDAD SOCIAL CORPORATIVA

Nuestra Responsabilidad Social Corporativa está basada en la contribución activa y voluntaria al mejoramiento social, económico y ambiental. Para ello, hemos a lo largo de los años con distintas ONGs como "Médicos sin Fronteras", "Médicos del Mundo", "OXFAM Intermón", "Malembe" y "Creer en ellas". Todas ellas llevan a cabo acciones dirigidas a mejorar la salud y la educación de personas de diferentes lugares del mundo que no tienen recursos.

Apoyamos a la Diversidad Funcional encargando trabajos externos a "Los Centros Ocupacionales Tomás de Osma". Estos centros facilitan a los usuarios que presentan una diversidad funcional de tipo intelectual en edad laboral, una Atención Habilitadora y/o Rehabilitadora Integral, con la finalidad de conseguir los más altos niveles posibles de autonomía, bienestar e inclusión, ya que tienen dificultades para integrarse en un centro especial de empleo o empresa ordinaria.

Special Acknowledgements

To our team, family, friends, volunteers, and neighbors who got their hands dirty with us to clean up and rebuild our business. To our clients for their patience and loyalty. To those who gave us a voice and visibility. Without you, we wouldn't be here today.

We also want to thank our friends in the industry who have supported us—ECOcero, ISIMAR, and GreenArea. Great companies with an amazing team of people. Thank you for your empathy and generosity.

Agradecimientos especiales

A nuestro equipo, familiares, amigos, voluntarios y vecinos que se ensuciaron con nosotros para limpiar y volver a levantar nuestro negocio.

A nuestros clientes por su paciencia y fidelidad.

A los que han dado voz y visibilidad. Sin vosotros no estaríamos hoy aquí.

Agradecemos también a nuestros amigos del sector que nos han apoyado. ECOcero, ISIMAR y GreenArea. Grandes empresas con un gran equipo humano. Gracias por vuestra empatía y generosidad.
